

Appendix. Nest sites (yellow circles), approximate territory locations (known territories but nest was not found in 2011) (pink circles), and 95% kernel home ranges for white-headed woodpeckers in each of the four primary study areas: Mission Creek (top, page *i*), Nile (bottom, page *i*), Rimrock (left, page *ii*), and Wenas Creek (right, page *ii*). Arrows indicate internest distances for neighboring pairs and each nest is labeled with the territory's name. Kernel home ranges show areas of intense use in blue, moderate use in green, and light use in yellow.
