## Notice of Pre-Bid Site Visit:

### Mad River River Mile 1.1-4.3 Restoration Project

October 2nd, 2023

Dear Contractor:

The Yakama Nation's Upper Columbia Habitat Restoration Project is planning to provide a pre-bid project tour for an upcoming instream habitat restoration project taking place on the Mad River in Chelan County, Washington, in the summer of 2024.

The Yakama Nation intends to accept construction company bids for this project area in the winter or early spring of 2024, however we are still completing the final construction bid packet for this project area and won't be asking for bids at this time.

Given the project site's high elevation in the Entiat Subbasin, we are seeking to provide the only pre-bid project tour to potential construction contractors on **Monday, October 23rd, 2023**, so that the site can be reviewed by interested parties before winter conditions set in. The site tour will be led by Yakama Nation Fisheries Habitat Biologists James Hudson and Maddie Eckmann, who are the Project Managers, and Dan Miller, the Engineer of Record from Interfluve Inc.

**Pre-registration for this site visit with James Hudson is required.** To register your attendance please email James Hudson at [hudj@yakamafish-nsn.gov](mailto:hudj@yakamafish-nsn.gov) stating your company name, and the names of all members of your party that plan on attending the tour.

The tour is expected to take approximately two hours, so please be prepared with adequate food, water, and clothing for touring a rugged natural area. The site can be toured without crossing standing water areas, so hip boots and chest waders will not be necessary.

Interested contractor attendance to this pre-bid tour is strongly encouraged.
